OPL

DISCOVER SAPPHIRE

Manage your Girbau OPL laundry remotely

SAPPHIRE.GIRBAU.COM

GIRBAU
LAUNDRY BEYOND LAUNDRY

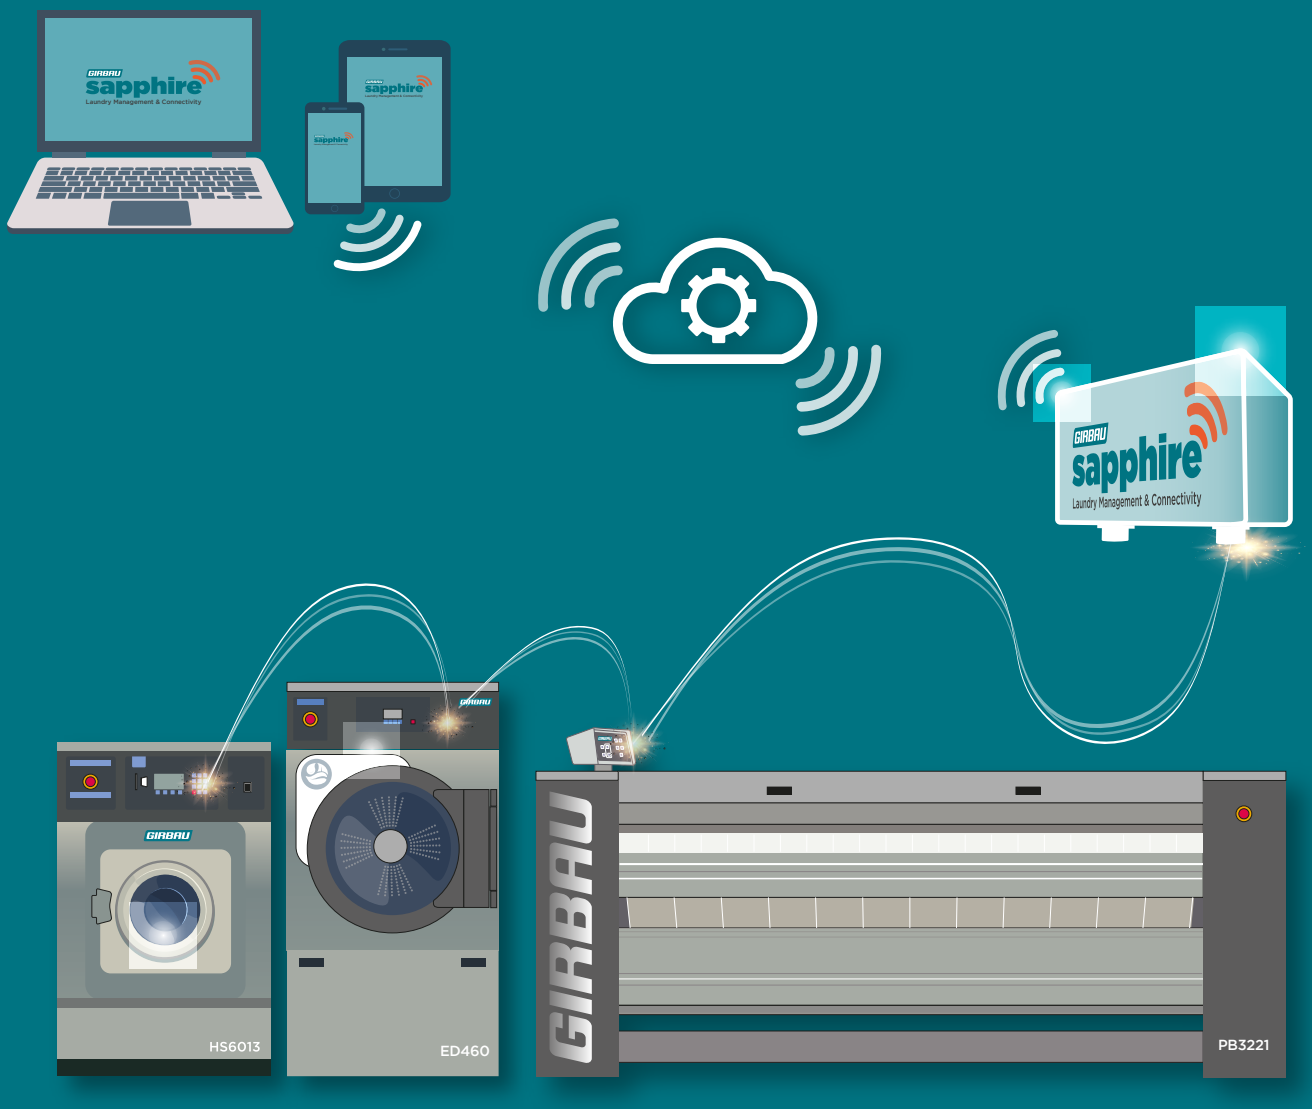
HOW **SAPPHIRE** WORKS

A single **Sapphire Connectivity Box** is enough to connect all the Girbau machines in your laundry.

This device connects your laundry immediately to the **Sapphire cloud** where the information is processed.

@

Using the **Sapphire web platform** you can monitor, control and configure your laundry.



MAIN **BENEFITS**

MONITORING YOUR BUSINESS

View your personalised indicators so that you can know at a glance whether your laundry is working properly or needs your attention.

MINIMISE YOUR RUNNING COSTS

Use ready-made reports to analyse how your laundry is working and take action to optimise your workflows. Be aware of which programmes are used the most. You can use it to associate these programmes with customers, areas of your business or simply see what types of fabric you are processing.

CUT IDLE TIMES

View the status of each of your machines in real time and if one of them sets off an alarm, see the details of the problem, its cause and a possible solution.

VIEW THE PROGRESS OF CYCLES IN TV MODE

TV mode lets you see in real time how your machine's cycles are progressing, with details of temperature, water level and phases in the cycle. It also allows you to set conditions for cycles, such as for example thermal disinfection or a good spin.

GIRBAU

Sapphire **for owners of OPL laundries**

Production in kg

Check quickly, in real time or by accessing the history, how many kg have been washed and dried compared to the average for the last 30 days.

Activity report

A series of reports set up in Sapphire enable you to spot inefficient operations in your laundry. Take steps to maximise your throughput and cut your costs.

Machine alarms

Check machine down times. Check a history of alarms, causes and possible solutions. Set up and receive notifications via sms and/or email when a selected alarm is tripped.

Machine status

Check whether your machines are available, working, pending to be unload, disconnected, out of order or with an alarm active.

Machine manuals

Consult the specific manuals for each model of your machines easily to take full advantage of their features.

Cycle details

Analyse the evolution of water levels, temperatures and phases in the cycles. Set up visual indicators of conditions to see, for example whether the conditions for thermal disinfection or a good spin have been met.

Goals

Set your goals for your laundry. This indicator lets you see at a glance whether your laundry is performing as expected.

Reports on programmes used

Monitor which programmes are used over a period of time, machine by machine. These programmes can identify clients, areas of your business or simply what types of fabric you are processing.

Contact the technical support service

If an alarm is tripped on a machine, or if you have any other needs, get in touch with the technical support service directly, by telephone or email.
